NOTE TAKING APP BUGS AND APPROACH TO RESOLVE THEM

The note-taking application with only one route (i.e. Home Route). This application is broken.

From the **app.py** code:
```
 from flask import Flask, render_template, request
app = Flask(__name__) notes = []
@app.route('/', methods=["POST"])
def index(): note = request.args.get("note")
notes.append(note)
return render_template("home.html", notes=notes)

 if __name__ == '__main__':
app.run(debug=True)
```

Bug:
- The above code doesn't work because app.route does not have GET method in it.
- Replace ["POST"] - - - -["GET","POST"]

Approach:
- GET,POST both are compulsory for the note taking app to work,so we need to add both of them app route to get this to work.

 After changing the **app.py** code:

```
   from flask import Flask, render_template, request
app = Flask(__name__) notes = []
@app.route('/', methods=["GET","POST"])
def index(): note = request.args.get("note")
notes.append(note)
return render_template("home.html", notes=notes)

 if __name__ == '__main__':
app.run(debug=True)
```

*** Now this will get the app working.
